PROJECT CARGO

BENEFITS

The first and only liner service between Europe and the Great Lakes

The Europe Great Lakes Service has been offering twice-monthly year-round sailings between Europe and the Great Lakes for many years. Even when the Great Lakes are closed we can guarantee that your cargo is transported to this area.

The service between Antwerp, Europe and the Great Lakes' ports offers a quick transit for various cargo commodities typically with a 15-day transit time.

Other Great Lakes' ports and onward connections are also available through Spliethoff's Americas' logistics network to the US Midwest. Spliethoff's European

logistics network makes through bills of lading possible to and from Russia, Finland, the Baltic States, the UK, Spain, the Continent and any other destination worldwide.
